PREFACE

CENTRAL CEMETERY

Located at Main Street in Carver Center, Plymouth County, Massachusetts

Research by John A. Shaw So. Carver, MA Copyright 1997

I have separated the cemetery into nine sections as shown on the key map following the preface.

Sections A, B, C, D & E have been assigned lot numbers as the individual lots are apparent on the ground with the names listed from left to right in each lot as you face the section as shown on the individual section plans.

Sections F, G, H & I are listed by rows as most of the prior lots are not so evident on the ground. Each row is listed from left to right as you face the section as shown on the individual section plans.

Each section has its own section plan with the last name of the interred printed on the lot, or in the case of rows, the names are printed in their approximate location along the rows.

All maps are not to scale but are more of a schematic to help visualize locations.

An asterisk "*" preceding a name indicates that person was previously listed in a book published by the "Friends of the Middleborough Public Library, Inc." in 1995 entitled "Old Cemeteries of Southeastern Massachusetts" copies of which may be purchased at that library. The publication is a compilation of records by Charles M. Thatcher during the 1880s. The book lists eighty five names in the Central Cemetery obtained by Thatcher. My listings do not agree with his compilation in a few instances by either spelling of names or the dates as I found them.

Some of the engravings were impossible to decipher, particularly on the epitaphs.

On the following pages I have indicated letters, words or numbers that I could not decipher by: "---" or "-?-".

I have entered all information into two types of indexes:

The first is by sections listing all info from each stone on each lot as it appears including epitaphs.

The second index combines all sections with names listed in alphabetical order and with reference as to where that name can be found by section and lot number or by rows and includes dates of birth and death and marital status if known and in the case of a married woman she is also listed under her maiden name if given.

The earliest burial I found was 18 month old George Shaw in 1812 located at lot 8 Section "A".

The oldest birth I found was a Joseph Vaughan born in 1748 who died in 1838 in his 90th year located at Lot 7 Section "B".

A total of 1,019 individual names were found and entered in these indexes.

The totals of some of the more common names found are as follows:

Shaw	97	Vaughan	34
Shurtleff	74	Holmes	29
Thomas	42	Lucas	26
Atwood	35	Barrows	18

CENTRAL CEMETERY

Section "G"

At first cross driveway facing the rear of cemetery with Sect."F" to your back, Sect. "I" to the left and Sect. "D" to the right. (See key map)

The original old undated plan showed four rows of lots with some being wider than others. Present burial plots are approximately four by eight feet which allows more than one row of these smaller plots within the original lot widths

I have followed the basic layout of the old plan showing the four rows of lots but did not assign lot numbers. The listings are from left to right in each of the four rows and will include one or more rows of the present day smaller plots.
